Goodbye Cavities, Hello CariFree!

Safe to use every day, our products are highly effective and scientifically proven to prevent cavities. Our cavity prevention blueprint includes:

- ✓ pH elevated products to neutralize acidity
- ✓ Antibacterial therapy to kill germs
- ✓ Nano HA, a building block of enamel
- ✓ Fluoride for remineralization

What makes CariFree unique and effective?

pH Neutralization

Neutralizes acids in the biofilm

Fluoride

Prevents tooth decay

Sodium Hypochlorite

Kills germs

Nano Hydroxyapatite

Building block of enamel

Xylitol

May reduce growth and acid production of cavity-causing bacteria

While brushing and flossing can reduce bacteria, neither alters the bacterial balance in your mouth. CariFree products are scientifically proven to reduce acidic cavity-causing bacteria, strengthen your enamel and keep you healthy in the long term.

We are excited to be with you on your journey to better oral health!

PRO Gel 5000

A prescription-strength fluoride, low abrasion tooth gel that combines proven anti-cavity benefits including nano hydroxyapatite and our unique, patented pH+ technology. Recommended for ages 6+

Gel 1100

A low abrasion tooth gel that combines proven anti-cavity benefits including fluoride, nano hydroxyapatite and our unique, patented pH+ technology. Recommended for ages 3–5

Treatment Rinse
