

PRO Gel 5000

Remineralize & prevent cavities at the same time with our one-of-a-kind, elevated pH toothpaste. It features a unique combination of nano-HA (nanoXIM) and 1.1% fluoride.

Treatment Rinse

If you're dealing with or at risk for cavities, this one is for you! Treat and reduce the bacteria causing cavities for a balanced oral environment.

Created by a Dentist

Created by Dr. Kim Kutsch in 2004 to help his own patients, CariFree now helps prevent cavities worldwide.

Science-focused

Our leaders are constantly learning and applying new science to develop products that can make a difference.

Made in the USA

We proudly manufacture and ship our products from our own facilities in Albany, Oregon.

Maintenance Rinse

The perfect rinse to maintain optimal oral health! Enriched with fluoride to prevent cavities, an elevated pH to support a healthy smile and naturally sweetened with xylitol for added protection.

It's time for a different approach

Join thousands of patients who have transformed their smiles!

08/26/24 ★★★★★

"I have been using this brand for a few years now and have had NO CAVITIES. In the past, I usually had several a year."

– April W.

Created by Dentist Dr. V. Kim Kutsch
 After struggling to find effective options for his cavity-prone patients, Dr. Kutsch was motivated to create a solution that wouldn't just treat cavities but prevent them entirely. He collaborated with world-renowned researchers and in 2004 CariFree was born.

CariFree targets the root cause of decay with a scientific approach of balancing bacteria for a healthy oral environment. We formulate with the best ingredients available to make our customers cavity-free for life!

Reset & Restore Healthy Bacteria

Treat & reduce cavity-causing bacteria to create a balanced and healthy oral environment.

Elevated pH Technology

Neutralize acids in the biofilm and promote better oral health with products that have pH ranges above neutral.

Remineralizing Power

Prevent cavities and remineralize at the same time! Two power-house ingredients, fluoride and nano-HA (nanoXIM by FLUIDINOVA) combine to create a healthier smile.

Caries Risk Assessment

Our personalized system can help you determine your risk for future cavities and receive a treatment plan just for you.
