

## Pro Gel 5000

Give yourself the protection you deserve – because a healthy mouth is the foundation for a healthy body.

This gel features pH Buffering Technology to help maintain oral pH balance and fight acids even after brushing. It uniquely combines 1.1% sodium fluoride and medical-grade nano-hydroxyapatite (n-HA) to deliver powerful remineralization. Its soothing, low-abrasion formula promotes lasting oral health and comfort.

-  n-HA + Fluoride to Treat Cavities
-  pH Buffering Technology to Control Acids
-  Low Abrasion Formula to Protect Enamel
-  Mild & Moistening

**Instructions for Use:** Brush daily after rinsing. Avoid rinsing or eating for 30 minutes after use.
