Reset & Restore Healthy Bacteria

Treat & reduce cavity-causing bacteria to create a balanced and healthy oral environment.

Elevated pH Technology

Neutralize acids in the biofilm and promote better oral health with products that have pH ranges above neutral.

Remineralizing Power

Prevent cavities and remineralize at the same time! Two power-house ingredients, fluoride and nano-HA (nanoXIM by FLUIDINOVA) combine to create a healthier smile.

Caries Risk Assessment

Our personalized system can help you determine your risk for future cavities and receive a treatment plan just for you.
